Especially bigger Git repositories with thousands of remote branches, tags, etc now benefit significantly from our work in this area: opening such a repository, displaying the working copy, loading changesets, and many other actions are up to 5x faster than before! We will never stop to fine-tune and improve performance.. Thanks to all of our users for joining us on this journey! If you haven't already, make sure to update your Tower app to version 4 - and have fun undoing mistakes! This is quite a sensational headline, I know.. Since version 3.1, Tower supports image diffs for a variety of formats (PNG, JPG, GIF, BMP, TIFF, JPEG2000, HEIC).. Now, let's look at why branches are so important Working in Contexts. But the truth is: it's not an exaggeration Using branches in your day-to-day work might very well prove to make you a better programmer or designer.

you're also trying to fix an annoying bug (context 3) On the side, you also update some content on your FAQ pages (context 4), while.

User Profiles Many developers maintain multiple identities Before your imagination starts to run wild: I'm talking about different committer identities and email addresses ? One profile for work, another one for side projects, and maybe yet another one for an OpenSource project.. In real-world projects, work always happens in multiple of these contexts in parallel: While you're preparing 2 new variations of your website's design (context 1 & 2).. This leaves you with an unlimited amount of different contexts Most likely, you'll have at least one context for your 'main' or 'production' state, and another context for each feature, bugfix, experiment, etc.. Git Tower For Mac Osx Git Tower For Macbook Git Tower For Mac Git Tower Vs Github For Mac Git tower This is quite a sensational headline, I know..
